

16991 is an AC Variable Power Supply. Power Supply can be used for variety of applications like in Education, Engineering, Telecommunication, Industrial Electronics, Nuclear Sciences, Analogue and Digital Computers, Defense, Institutes, Experimental Laboratories, Testing, Production.

Specifications:

- 01 Single Mode of Operation:
 - * Output Voltage 220V AC @ 9.09 Amp at full load
- 02 Output Voltage 220 V AC may be vary due to Input Voltage fluctuation
- 03 Inbuilt 2 KVA Transformer
- 04 Terminals are provided for AC outputs
- 05 Mains On / Off switch, as an 16 Amp MCB.
- 06 Input voltage 230V \pm 10% at 50Hz

Note: Specifications are subject to change.
