Specifications:-

- 2.54mm pin interface leads

- Operating Voltage: 5V.

- Long service life and stable performance

- Standard interface and electronic building blocks

- Widely use in Arduino DIY projects

- Cross rocker as a two-way 10K resistor, with the rocker in a different direction

- This is a dual axis high quality JoyStick Module . It can be used to sense movements in 2 directions(axes).

- It also has a inbuilt switch which can be activated by pressing the stick.Directional movements are simply two potentiometers - one for each axis. Pots are ~10k each.

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
