Specifications:-

- High-quality etched fr4 glass-epoxy circuit board
- 800 holes total
- 042" (1.07mm) holes sized for ics or square post headers
- 1" hole spacing for dip integrated circuits and headers
- Two power rails are provided along the board centerline
- Abs plastic material
- Light weight, easy to carry
- This is a high-quality breadboard with 800 connecting points, which is the standard size. The board has neatly marked positive and negative (red and blue) rails with numbers to make it beginner-friendly. It also has well-designed holes that snug in components smoothly and enables high re-usability.
