

**Specification:-**

- Usage: Pressure Sensor
- Output Type: Digital Sensor
- Technical Indexes: BF series
- High-precision resistance strain gauge is a foil metal strain gauge, widely used in pressure sensors and weighing sensors. Is mainly fit for 0.02 level crafts pressure sensor which means its output deviation should be controlled within 0.02 so its precision is really high. You could use it to measure the strain of components directly. This Product is known as Load Sensor, Pressure Sensor, Force Sensor High Precision Resistance Strain Gauge / Pressure Sensor / Weighing Sensor 350 Ohm.

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
