

Specification:-

- In Simple Terms, The Jig Is A Tool That Guides The Cutting (or Machining) Tool. The Fixture Is A Tool Which Holds The Work Piece With The Machine Bed Precisely At The Desired Location. The Jig And Fixture Increases The Production Rate And Reduces The Non productive Loading Time Of The Work Piece. The Most Common Type Of Drill Jig And Fixture, Is One Which Guides The Drill Bit For Creating Holes At Desired Locations. The Apparatus Shows Its Functionality Used For Creating Holes In Fixed Pcd. It Can Be Attached To Common Drill Machine And Comes With Sample Workpiece.

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
