

**Description:**

The proposed kits consist of a set of components commonly used in the electro mechanics construction and a laboratory exercise handbook.

The components sizes, quality and hardness have been chosen so as to make easy the assembling work for the students and to guarantee at the same time an immediate understanding of the theoretical principles which lay the basis of the electric machines design.

Specifications :

- The kit completes with magnetic pack, coils and mechanical parts, copper excluded, for the construction of
- 2 transformers:
- Single phase, 1000 VA, 220/380 V
- Three phase, 1000 VA, 220/380 V

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
