

**Technical Specification:-**

- The fault simulation training bench is a fully operational refrigeration system equipped with two visible evaporators simulating a positive and negative cold room, operating from a single hermetic compressor-condenser group.
- The bench is fully fabricated from standard commercial components
- Including all primary and safety controls and will provide students with hands-on experience in adjusting and troubleshooting a three-phase multi-evaporator refrigeration system.
- A combination of different faults on the refrigeration circuit and the electrical circuit can be simulated by the trainer
- Allowing students to study both normal and abnormal operating conditions.
- Dimension: 4'x2'x5' (ft)
