

Features:

- Familiarization with real bearings and their function
- Identification of different bearings and seal/shield types
- Bearing Fault Identification
- Bearing Maintenance and Installation
- Powder-coated, silkscreened, 16-gauge, steel mounting panel with provision for mounting 12 bearings.
- Pre-assembled PVC mounting posts.
- Ten industrial bearings of different designs and including seals/shields of different types.
- Powder-coated, steel support frame, with steel storage tray.
- Engraved bearing identification tags with magnetic backing.

Tesca Bearing Samples Panel Trainer is designed to supplement courses in bearing identification and maintenance. More than simply a "display" board, the product includes magnetic identification tags for bearings supplied, allowing association with the bearing by the student.

Ten industrial quality bearings types are provided. These bearings include shields/seals of various configurations, allowing for the identification of shield/seal types and association with applicable magnetic tags.

The silk-screened panel face mounts to frame/tray assembly which can be used for other sample boards. The tray allows for the storage of components when not in use. The assembly can be mounted on the Benches or use stand-alone.

This demonstration board will help make any course in the industrial bearing selection, use, and maintenance more productive and realistic

Note: Specifications are subject to change.
