

Sectioned Diesel Injection Pump Order Code : 32594 is the in-line alternating pump for six cylinder diesel engine. The system is built up to expose the internal parts: a camshaft with its characteristic profile, the injection advance, the centrifugal rack, the small piston and the return spring. The piping is in transparent rubber to see the moving of fuel. All components are mounted on the wooden stand and able to move by turning the hand crank.

All parts of the training unit are well-furnished with an attention to details to present a beautiful appearance. Besides, major portions are painted with different colors and shades for easy identification. The steel part of the unit are painted with paint, which is resistant to petrol, diesel fuel and brake fluid for a longer life.

- Dimension in mm: 400 x 400 x 700 mm
- Weight Kgs: @. 20kg

Scope of delivery

- 3 workshop manuals

Source

- 6 cylinder diesel engine

Note: Specifications are subject to change.
