

Sci-tech Sectioned Worm & Roller Gear AM 089 is of the worm gear and tooth-rack type.

It is composed of:

- Steering wheel
- Rocker shaft
- Worms
- Roller

The unit is carefully sectioned and is painted with different colors and shades to better distinguish its parts. The sections clearly show all the internal parts and the steering gear operation can be demonstrated by using the hand wheel to turn the mechanism. Hence, it is possible to see the motion of the toothed rack as a result of the rotation of the steering wheel connected to the shaft of the worm gear, thus causing the rotation of the roller and the steering arm below. The unit is supplied on an elegant wooden base.

- Dimension in mm : 300(L) x 220(W) x 400(H)
- Weight in Kgs : @5

Note: Specifications are subject to change.
