

Experimental Training Board has been designed specifically for the study of Twin-Tee Oscillator by using vacuum Valve.

Object:

Study of the Twin-Tee Oscillator.

Features:

The board consists of the following built in parts :

01. A valve with base fixed on panel and wired internally.
 02. A band switch for changing values of RC combinations.
 03. Adequate no. of other electronic components.
- * Adequate no. of patch cords stackable from rear both ends 4mm spring loaded plug length ½ metre.
 - * Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections/ observation of waveforms.
 - * Strongly supported by detailed Operating Instructions, giving details of Object, Theory, Design procedures, Report Suggestions and Book References.
 - * Practical experience on these boards carries great educative value for Science and Engineering Students.

Other Apparatus Required:

- * IC Regulated Power Supply

Note: Specifications are subject to change.
