

36260 Experimental Training Board has been designed specifically for the study of Square and Triangular Wave Generator with Positive and Negative Feedback using OP-AMP ICs 741.

This Training Board is designed using Schmitt Trigger, Integrator and Inverting Amplifier to generate Square & Triangular waves using feedback principle. Also there are potentiometric controls for the change in Frequency, Amplitude and Duty cycle of waveforms.

Practical experience on this board carries great educative value for Science and Engineering Students.
