Computer Logic Training Board has been designed specifically for the study of Binary to Gray & Gray to Binary code conversion. The board is absolutely self contained and requires no other apparatus.

Practical experience on this board carries great educative value for Science and Engineering Students.

Object
01. To study of Binary to Gray code conversion.
02. To study of Gray to Binary code conversion.

Features
The board consists of the following built-in parts :
01. 5V D.C. at 100mA, IC regulated power supply.
02. Quad 2-input Ex-OR gate.
03. Switch for code selection.
04. Switches for logic selection
05. LEDs for visual indication of status.
06. Adequate no. of other Electronic Components.
07. Mains ON/OFF switch, Fuse and jewel light.
*   The unit is operative on 230V ±10% at 50Hz A.C. Mains.
*   Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections / observation of waveforms.
*   Strongly supported by detailed Operating Instructions, giving details of Object, Theory, Design procedures, Report Suggestions and Book References.

Note: Specifications are subject to change.
