

Computer Logic Training Board has been designed specifically for the study of Dual 4 Line to 1 Line Multiplexed output. The board is absolutely self contained and requires no other apparatus.

Practical experience on this board carries great educative value for science and Engineering students.

Object:

To study Dual Four Line to One Line multiplexed out put using.

Features:

The board consists of the following :

01. 5V DC at 100mA, IC Regulated Power Supply internally connected.
 02. Dual 4 Line to 1 Line Multiplexer IC.
 03. 14 LEDES for visual indication of logic status.
 04. 12 SPDT switches for Logic selection.
 05. Circuit of the IC displayed on the panel for better understanding.
 06. Adequate no. of other Electronic Components.
 07. Mains ON/OFF switch, Fuse & Jewel light.
- * The unit is operative on 230V \pm 10% at 50Hz AC Mains.
 - * Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections/ observation of waveforms.
 - * Strongly supported by detailed Operating Instructions, giving details of Object Theory, Design procedures, Report Suggestions and Book References.

Note: Specifications are subject to change.
