Computer Logic Training Board has been designed specifically for the study of Dual 1 Line to 4 Line Demultiplexer. The Training board gives a understanding of the phenomena of demultiplexing with DUAL one input (STROBE DATA) demultiplexed to four outputs using two control inputs (Address).

Practical experience on this board carries a great educative value for Science and Engineering students.

Object:
To study DUAL one line to four line Demultiplexer.

Feature
The board consists of the following built in parts :
01.   +5V DC at 100 mA IC Regulated Power Supply internally connected.
02.   Demultiplexer IC.
03.   6 SPDT switches for Logic selections.
04.   14 LEDS for visual indications of the status.
05.   Adequate no. of other Electronic Components.
06.   Mains ON/OFF switch, Fuse & Jewel light.
*   The unit is operative on 230V ±10% at 50Hz AC Mains.
*   Good Quality, reliable terminal/sockets are provided at appropriate places on panel for connections/ observation of waveforms.
*   Strongly supported by detailed Operating Instructions, giving details of Object Theory, Design procedures, Report Suggestions and Book References.

Note: Specifications are subject to change.
