

52009D.1 Level Process Control Trainer consists of an instrument panel and transparent tank with different type of level sensor that is useful for the study of principal and working of level measuring setup. This system comprises of the latest components, which reflect the latest technological innovations in this field. Level Process Control Trainer endows students and industry professionals to understand the concepts and working of level Measuring instruments and control, and enables them to learn advance and more complex level process systems.

52009D.1 consists of different types of level Sensors such as Ultrasonic, Capacitance type, Point to Point, Pressure type, Magnetic Float type and DAQ, Solenoid Valve, Sump tank and Acrylic Measuring tank. The setup has safety measures such as emergency shutdown and overheating protection. A wide range of experiments can be performed on the platform.

Features

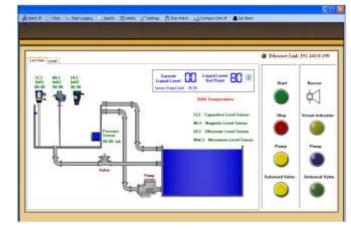

- Included of Different type of Level Sensors like: Ultrasonic, Capacitive type, Point to Point, Pressure type, Magnetic Float type
- 7" Human Machine Interface (HMI)
- Types of Controller : DAQ ,HMI, and PC
- Start, Stop, Pump, Solenoid Valve buttons and Indicator for Visual Indicator, Audio Indicator, Pump & Solenoid Valve
- Industry-standard instruments and controls
- · Interface with Ethernet based DAQ
- Sump Tank & Acrylic Measuring Tank
- 8 Channel 24 bit ADC
- Real time DAQ Interface with ADC and Digital input/output
- Academic and vocational study for process control engineers and plant technicians
- Experiments configurable through Patch board
- Self-contained, bench-mounting arrangement
- Supplied with Dashboard Software for supervisory control of the process with data acquisition
- Castor Wheel (with locking mechanism) is provided at legs
- of workstation so that it can be easily moved
- MCB is provided with AC supply for safety purpose
- Enhanced electrical safety consideration

Experiments

- Characteristics of Capacitance Type Level Sensor
- Characteristics of Pressure Type Level Sensor
- Characteristics of Ultrasonic Type Level Sensor
- Characteristics of Magnetic Float Type Level Sensor

- Characteristics of Point to Point Type Level Sensor
- Open & close loop function
- ON/OFF controller using software
- Proportional controller using software
- Proportional-Integral controller using software
- Proportional-Integral-Derivative controller using software
- Human Machine Interface (HMI)
- Process Control & Monitor by HMI
- · Creating Application/Screen in HMI
- Downloading and Uploading programs
- HMI Communication with PLC
- Creating Alarm Message in HMI
- Creating Trend in HMI
