

55880 Experimental Set-Up has been designed specifically to study the cantilever bending : different loading positions & other parameters.
The set up is absolutely self contained and requires no other apparatus. Practical experience on this set up carries great educative value for Science and Engineering Students.

OBJECT

01 Study of bending of a cantilever, its different loading positions & other parameters.

FEATURES

The Complete Experimental Set-up consists of following items:

- 01 A cantilever of steel material.
- 02 A firm clamping device to hold the cantilever horizontally.
- 03 Various loads with hanger : Total Wt. 500gm (Two sets 5 X 50gm)
- 04 Meter scale : Length of 50cm Wooden .
- 05 Strongly supported by detailed Operating Instructions, giving details of Object, Theory, Experimental procedure, Report Suggestions and Book References.

Note: Specifications are subject to change.
