

**Application:**

Used for recovering the asphalt (bitumen) from a solution of a previous extraction. The asphalt is recovered with properties substantially the same as those it possessed in the bituminous mixture and in quantities sufficient for further testing.

**The apparatus consists of a distillation assembly including:**

- Extraction flasks
- Glass tubing
- Inlet aeration tube
- Electric heating mantle
- Water-Jacketed condenser
- Thermometer
- Gas flowmeter
- Stands and clamps

Note: Specifications are subject to change.
