

Description :

This custom-built, scaled-down training system utilizes original TATA Bus components to provide comprehensive, hands-on instruction in the principles, operation, and diagnostics of heavy commercial vehicle Anti-lock Braking Systems (ABS). Designed for technical institutions and commercial vehicle service training centers.

Learning Objectives

Trainees will be able to:

- Identify and locate all major ABS components (ECU, Modulator, Sensors).
- Understand the principle of operation and air flow during normal and ABS braking.
- Perform basic functional tests and monitor ABS activation dynamically.
- Diagnose common faults using the integrated fault simulation pane

Included Accessories & Documentation

- Complete Wiring Diagram and Pneumatic Flow Chart displayed on the control panel.
- Detailed Operation and Maintenance Manual.
- Set of power cables and necessary connection hoses.

Note : For automotive trianers we use 60% New parts 40% Refurbished (Looking like new)

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
