

10937B Understanding Wi-Fi / Smart LED Television is a friendly training platform to learn the operation of Wi-Fi/Smart LED Television receiver. It is demonstrator cum training system specifically designed for the comprehensive practical study on Wi-Fi/Smart LED TV engineering for the beginners with a basic knowledge of the various electronic building blocks and fundamentals of communication system.

A Wi-Fi/Smart television have a built-in wireless adapter. This allows the TV to connect to the wireless high-speed internet connection and stream online content like movies and music through subscription services.

This didactic product develops the sense of investigation within the student and familiarises him with repair/design techniques. One of the main features of this training system is fault simulation to educate on actual fault finding, by simulating faults on this platform. The complete block diagram of Wi-Fi/Smart LED TV system is printed on the mimic. Finally this equipment allows us to do experiments and to observe waveforms/signals/voltages of different sections, which are guided thoroughly by theory and product tutorials to gain in-depth knowledge of the system
