

Technical Specifications

- To be used for introducing the basic logic gates (AND, OR, NOT, NAND, XOR) used in digital electronics as well as to investigate the laws of logical operations (de Morgan's law, associative law and distributive law), non-feedback logic circuits (switch networks), and simple flip-flop circuits with feedback. Switching states are displayed by means of an LED at each of the outputs.

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
