

36385 Kirchhoff's Current and Voltage Law Trainer is a compact, ready to use experiment board. It is useful for students to study and understand the basic concept behind Kirchhoff's Current Law and Kirchhoff's Voltage Law. It can be used as a stand alone unit with its in-built DC power supply and DC Ammeter.

Features

1. Stand alone unit, requires no extra accessories
2. Exclusive and compact design
3. In-built DC power supply
4. In-built DC Ammeter
5. Diagrammatic representation for the ease of connections

Object

1. Verification of Kirchhoff's Current Law
2. Verification of Kirchhoff's Voltage Law

Technical Specifications

Power Supply	: 230 V \pm 10%, 50 / 60 Hz
DC Power Supply	: +12V
Fuse	: 500 mA, slow blow

DC Ammeter

Range	: 2 μ A to 200mA
Display	: 3 1/2 digit
Dimensions (mm)	: W 240 x D 345 x H 110

Note: Specifications are subject to change.
