

**Description:**

A precision electroscopes designed for the detection and measurement of electric charges. The apparatus is equipped with a durable pointer system for reliable performance and clear deflection readings.

Technical Specifications:

- **Pointer:** Lightweight metal needle or strip (non-gold leaf type), ensuring durability and sensitivity.
- **Operation:** Pointer rotates freely around its center when charged, allowing accurate observation of electrostatic deflection.
- **View Panels:** One transparent face and one semi-transparent face for clear visibility from multiple angles.
- **Measurement Scale:** Internal calibrated scale provided for precise measurement of pointer deflection.
- **Top Plate:** Fitted with a metallic disc and spherical terminal for charge collection.
- **Earthing Terminal:** Equipped with a 4 mm socket for grounding connection.

Applications:

- Demonstration of electrostatic principles.
- Measurement of small electric charges.
- Educational and laboratory use.

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
