

The automotive training equipment engine training model vocational training equipment shows the composition and working principle of the single cylinder four-stroke diesel engine. The main components of the vocational training equipment automotive training equipment engine training model are dissected and painted in different colors to distinguish and learn. The vocational training equipment engine training model automotive training equipment is suitable for the teaching needs of the theory and maintenance training of 4-stroke diesel engine in vocational and technical schools, colleges and universities, training institutions.

## Technical Specifications :

- Engine: Single-cylinder 4-stroke diesel engine cutaway, air cooling
- Displacement: 210 cm<sup>3</sup>
- Power Approx: 4HP
- Base Plate
- Hand Wheel
- Function introduction of main components of the engine;
- Demonstration of the work principle and process of the engine;

*Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.*
