

Technical Specifications

- Pure Copper Zinc Anode set: included 1 pcs Pure copper Anode Sheet and 1 pcs Pure zinc Anode Sheet, Size: 0.039"x0.98"x5.98" (1 mm x 25 mm x 152mm)
- Copper Anode: high purity 99.95%, Zinc Anode: high purity 99.995%, great copper zinc anode sheet for copper electrodes and copper electroplating, can be used for school science experiments, school projects, lab application, experiment and scientific research
- Compared with other metals, Zinc metal is cost-effective and very easy to be plated. It is widely used to protect steel parts, especially to prevent oxidation and corrosion in the air, and for decoration
- Copper plating is the most widely used pre coating in the electroplating industry, including tin weldments, lead tin alloys and zinc die castings. Copper plating is required before nickel plating, gold plating and silver plating to improve the adhesion of the coating.
