

## HYDRAULIC FLOW CONTROL VALVES (3/2, 4/2, 5/2, 4/3 Direction Control Valves)

Transparent-body solenoid valves for functional demonstration and technical training

### PRODUCT OVERVIEW

This range of **Hydraulic Flow Control Valves** is designed specifically for **educational and training purposes**. Each valve features a **transparent body**, enabling clear visualization of internal operations. Integrated **solenoids** allow for controlled actuation, making these valves ideal for hydraulic circuit simulations, diagnostics, and instructional use.

### FEATURES

- Transparent body for internal flow visibility
- Electrically operated via solenoids (except where noted)
- Rugged design suitable for lab and classroom environments
- Easy integration into training benches or test rigs
- Facilitates practical understanding of directional control functions

### APPLICATIONS

- Technical education and vocational training
- Hydraulics and pneumatics lab equipment
- Fluid power system demonstrations
- Engineering institutions and research centers
