

Key Features

- Heat transfer in a heat exchanger
- Heat exchanger vessel
- Covered with a coil and motor
- Cross-flow heat exchanger from water to air
- Required table area: 900 mm x 650 mm
- Electrical voltage 220 to 240 volts AC 60 Hz 13 amps
- The equipment consists of a heat exchanger with a service unit in addition to a water cooler. The main switch for the equipment is used to turn the equipment on and off. The fluid flow is controlled by the pump controller unit. The heater temperature is controlled by a temperature controller unit. The inlet and outlet temperature of the cold and hot fluids are displayed on the control panel
