

**Description:**

The Anaerobic Jar is a high-quality, laboratory-grade system designed for cultivating anaerobic microorganisms under strictly controlled conditions. Ideal for microbiology labs, this system ensures an airtight, controlled CO₂ atmosphere.

Technical Specifications:

- **Capacity:**
 - Accommodates a minimum of 15 Petri dishes (100 mm x 15 mm)
 - Total volume capacity: 3.5 litres
- **Material & Construction:**
 - Transparent anaerobic culture jar for easy visibility
 - Stainless steel Petri plate carrier (holds 15 dishes)
 - Stainless steel test tube carrier
- **Lid Features:**
 - Fitted with a combination pressure-vacuum gauge
 - Includes a Schrader valve and screws for vacuum pump connection
 - Equipped with O-ring gasket for airtight sealing

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.

- Supplied complete with clamp and screw
- **Accessories Included:**
 - Pressure gauge
 - Pressure release valve
 - Catalyst/gas pouch starter kit
 - Anaerobe indicator tablets

Applications:

Ideal for maintaining strict anaerobic conditions required for microbiological testing and culture development.
