

Algometer

The algometer is designed to quantitatively measure pain threshold and pain sensitivity. It features a calibrated pressure application system that ensures consistent and precise application of force to specific body areas, making it ideal for clinical and research settings.

Key Features:

- Accurately measures pressure pain threshold (PPT)
- Calibrated force application for reproducibility
- Ergonomic design for easy handling
- Suitable for musculoskeletal and neurological assessments

Applications:

- Pain sensitivity evaluation
- Clinical diagnostics
- Rehabilitation monitoring
- Research studies involving pain perception

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
