TECHNICAL SPECIFICATION

ELECTRICAL	220 V
WATER CAPACITY	3 L
OPERATING PRESSURE	6 - 9 BAR
WATTAGE	1750W
BOILER TEMPERATURE	150 °C - 160 °C
TIP TEMPERATURE	121°C
TANK CONSTRUCTION	Stainless steel 18/10 (FOOD GRADE)
LENGTH OF ELECTRICAL CORD	4.7 m
LENGTH OF STEAM HOSE	2.95 m
NET WEIGHT	10.5 kg
PACKING WEIGHT	14 kg
PRODUCT DIMENSIONS	48 x 37 x 35.5 cm
PACKING DIMENSIONS	58.5 x 52 x 41 cm

Can be used with tap water (Equipped with Anti-scaling technology)

What is Anti-Scaling technology

What is Anti-scaling technology?

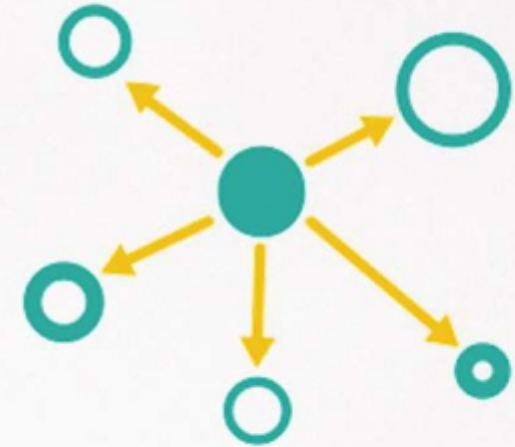

CompactO steam chamber comes with a mineral crystallization chamber with powerful magnetically charged "filter" inside. This filter converts the molecular structure of larger minerals found in tap water (like calcium), into smaller crystallized molecules.

**ANTI_SCALING
TECHNOLOGY**

How does Anti-scaling Technology work?

By crystallization the molecular structure, calcium and magnesium minerals are rendered smaller and lighter. This allows the minerals to float on the surface of the water in the tank rather than sink to the bottom as sediment. As such there is no scale build up in the machine. steam containing crystalized minerals much like "Soft water" leaving no residue.

Why choose Anti-scaling Technology ?

By adding the Anti-scaling technology to the already powerful operating steam pressure system. We have created the leading professional chemical- free steam cleaning and sanitizing machines.
