

Product Description

The CBR Mould is a precision-engineered component used in California Bearing Ratio (CBR) testing for preparing and compacting soil specimens. Manufactured from heavy-duty steel, it ensures durability, dimensional accuracy, and reliable performance in laboratory and field applications.

Technical Specifications

- **Internal Diameter:** 152 mm
- **Height:** 178 mm
- **Material:** Heavy-duty steel construction

Components Included

- Collar
- Perforated base plate
- Spacer disc

Key Features

- High-strength, wear-resistant construction
- Accurate dimensions for standard compliance
- Easy assembly and handling
- Suitable for repeated laboratory use

Applications

- Preparation of soil samples for CBR testing
- Use in geotechnical and civil engineering laboratories
- Road and pavement design testing

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
