

**SPECIFICATIONS:-**

- Whenever we work with embedded system we need a reliable output device with the help of which we get the required information, now this problem is solved with the introduction of 16 character by 2 (16X2) LCD. Uses - Alphanumeric output, Information Display, Process status, in short we can keep eye on every move of our microcontroller. Available with male connector for easy interface with microcontroller.

**Features:**

- Voltage rating – 5V
- Dimension -
- Include – LED Backlight
- Interface – Female / Male header

*Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.*
