

**Specifications:-**

- This apparatus consists of a 6' tall steel frame work to hold the struts & and apply an increasing force untill the strut buckles
- Buckling force application devices, Deflection measuring devices, Number of struts of different sizes (6 Nos)
- To demonstrate different buckling Theories such a Euler Theory & Rankine Gorden Theory
- To determine the buckling load of number of struts of different sizes & to compare the Rankine & Euler loads for the same strut

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
