

Used for reducing bulk samples of aggregates, soils, sand, cement, coal, etc., to a representative sample by dividing the material into four equal parts.

#### FEATURES:

- Four rigid blades fixed at 90° to each other forming a cross-shaped divider.
- Divides the sample into four equal parts during sample preparation.
- Manufactured from heavy-duty stainless steel for durability and corrosion resistance.
- Straight and sharp edges for accurate sample division.
- Provided with handles for easy positioning and lifting.
- Suitable for use with Hot Mix Asphalt (HMA) and aggregate materials.
- Easy to clean and maintain.

#### APPLICATION:

Ideal for use in construction materials laboratories, road & highway projects, asphalt plants, and quality control labs.

#### SPECIFICATIONS:

- Type - Cross type, 4 blade
- Material - Stainless Steel (SS304)
- Blade Thickness – 6 mm
- Construction - Fabricated
- Handles – 2 Nos
- Finish - Powder Coated / Stainless Steel Finish
- Use - Sample preparation and reduction
