

Description

The Drone Kit Set with Simulator is an entry-level unmanned aerial vehicle (UAV) training solution designed specifically for educational and training purposes. The package combines a low-range educational drone with a flight simulator, enabling learners to understand drone fundamentals, flight dynamics, and basic piloting skills in a safe and controlled environment.

Key Features

- **Educational Drone Kit:**
 - Low-range drone suitable for indoor and controlled outdoor training
 - Designed for beginners and students
- **Flight Simulator Included:**
 - Simulator software for virtual flight practice
 - Enables learning of flight controls, stability, and maneuvering without risk of hardware damage

Training Capabilities

- Introduction to drone components and basic UAV technology
- Understanding of flight dynamics and control principles
- Practice of take-off, landing, hovering, and basic maneuvers using simulator and real drone

Educational Applications

- Drone and UAV technology education
- STEM and robotics training programs
- Safe pilot training for beginners

Applications

- Schools, colleges, and training institutes
