

**Purpose:**

To be used to understand low voltage electrical systems on hybrid and electric vehicles, as well as normal vehicles.

System Includes (All Real Vehicle Low Voltage Systems):

- Injection System
- Ignition System
- Starting System
- Charging System
- Power Supply Battery
- Wiper System
- Lighting and Warning System
- Instrument Cluster
- Sound System
- ECU
- Door Control and Central Locking System
- Window Control System
- Horn and Internal Lighting System

Features:

- Test points to use measurement tools to test volts, resistance, and signals of sensors and actuators

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.

- **OBDII DLC** is installed where the electronic scan tool can be used to test and diagnose
- Equipped with electronic fault insertion system:
 - Can be used either remotely or by direct entry via touch screen or key buttons
 - Allows insertion of faults into the system for diagnostic training
- Installed on a training panel or structure with **lockable wheels** for easy mobility
- The **circuit diagram** of the system is printed in **color and in English**
- Powered with **220 VAC, 50Hz**, with emergency switch
- All necessary **relays, actuators, fuses, and circuit breakers** are installed at the panel

Note: Specifications are subject to change, Photos shown above are Indicative, Actual Product can Vary.
